- ☐ Workspace creation and management
- ☐ Site creation wizard complete
- ☐ Subdomain generation working
- ☐ Custom domain connection tested
- ☐ Site isolation verified
- ☐ Multi-site per user account

Template System

- ☐ Template selection in onboarding
- ☐ Template installation working
- ☐ Template activation/deactivation
- ☐ Theme customization (colors, fonts)
- ☐ Template preview functional
- ☐ Sample data seeding (products, categories, blogs)

Ecommerce Core

- ☐ Product CRUD operations
- ☐ Product variants working
- ☐ Product images upload
- ☐ Category management
- ☐ Stock tracking
- ☐ Cart functionality

- ☐ Checkout flow
 - ☐ Order management
 - ☐ Customer management
 - ☐ Coupon system
-

Payment Integration

Paystack

- ☐ API key configuration
- ☐ Payment initialization tested
- ☐ Webhook verification
- ☐ Transaction verification
- ☐ Card payments working
- ☐ Bank transfer working
- ☐ USSD payments tested

Flutterwave

- ☐ API key configuration
- ☐ Payment initialization
- ☐ Webhook handling
- ☐ Card and mobile money

Monnify

- ☐ API key/contract code setup
- ☐ Access token generation
- ☐ Payment initialization
- ☐ Bank transfer, cards, USSD

Payment Settings

- ☐ Pay on delivery toggle
 - ☐ Bank transfer confirmation
 - ☐ Guest checkout enabled
 - ☐ Order status updates on payment
-

AI Features

AI Service

- ☐ AI provider configuration (OpenAI, Anthropic, Google, Groq)
- ☐ Failover mechanism tested
- ☐ RAG service indexing
- ☐ AI chat assistant
- ☐ AI copy generation
- ☐ AI page generation
- ☐ AI product description generation
- ☐ AI theme generation

Builder & Editor

Drag-and-Drop Builder

- ☐ BuilderWorkspace functional
- ☐ LeftSidebar (blocks, components)
- ☐ RightSidebar (properties)
- ☐ MediaLibrary upload
- ☐ Real-time preview
- ☐ Block rendering
- ☐ Page saving/publishing
- ☐ Template block renderer

Africa-Specific Features

Local Payments

- ☐ WhatsApp ordering integration
- ☐ Bank transfer checkout
- ☐ Pay on delivery option
- ☐ Area-based delivery fees
- ☐ Delivery zones configuration

Localization

- ☐ Multi-currency support (NGN, GHS, KES, etc.)
- ☐ Local language support
- ☐ Country-specific defaults
- ☐ Phone number validation
- ☐ Address formatting

Social Commerce

- ☐ WhatsApp number integration
- ☐ Social links (Instagram, Facebook, TikTok)
- ☐ WhatsApp notifications
- ☐ Order confirmation via WhatsApp

Admin Platform

Admin Dashboard

- ☐ User management
- ☐ Site management
- ☐ Theme marketplace
- ☐ Plugin marketplace
- ☐ System analytics
- ☐ Abuse/spam detection

- ☐ Feature flags

Template Management

- ☐ Add/edit themes
- ☐ Categorize by industry
- ☐ Mark as premium/featured
- ☐ Theme preview
- ☐ Version management
- ☐ Safe retirement

Plugin Management

- ☐ Plugin approval workflow
 - ☐ AI-generated plugin review
 - ☐ Plugin security checks
 - ☐ Marketplace listings
-

Analytics & Reporting

Basic Analytics

- ☐ Page views tracking
 - ☐ Visitor analytics
 - ☐ Sales analytics
 - ☐ Conversion tracking
 - ☐ Order analytics
 - ☐ Customer analytics
-

Security & Performance

Security

- ☐ SQL injection prevention
- ☐ XSS protection
- ☐ CSRF protection
- ☐ Rate limiting
- ☐ Input validation
- ☐ Secure file uploads
- ☐ API authentication
- ☐ Webhook signature verification

Performance

- ☐ Page load speed < 3s
- ☐ Image optimization
- ☐ Database query optimization
- ☐ Caching strategy
- ☐ CDN integration
- ☐ Mobile responsiveness

Testing

E2E Tests

- ☐ User signup/login flow
- ☐ Site creation wizard
- ☐ Product management
- ☐ Checkout flow
- ☐ Payment processing
- ☐ Order management

Unit Tests

- ☐ Core utilities
- ☐ API helpers
- ☐ Validators
- ☐ Payment functions
- ☐ AI service

Deployment

Infrastructure

- ☐ Database migrations
- ☐ Environment variables configured
- ☐ SSL certificates
- ☐ Domain DNS setup
- ☐ CDN configuration
- ☐ Backup strategy
- ☐ Monitoring setup
- ☐ Error tracking (Sentry)

Production Readiness

- ☐ Build process working
- ☐ Environment-specific configs
- ☐ Database connection pooling
- ☐ Redis for caching/sessions
- ☐ Queue system for background jobs
- ☐ Log aggregation

Mobile Experience

Responsive Design

- ☐ Mobile storefront tested
- ☐ Mobile dashboard functional
- ☐ Touch interactions optimized

- ☐ Mobile checkout flow
 - ☐ Low-data mode tested
-

Documentation

User Documentation

- ☐ Getting started guide
- ☐ Site creation tutorial
- ☐ Payment setup guide
- ☐ Theme customization guide
- ☐ FAQ

Developer Documentation

- ☐ API documentation
 - ☐ Plugin development guide
 - ☐ Theme development guide
 - ☐ Deployment guide
-

Success Metrics Tracking

Activation Metrics

- ☐ Time to first published site tracking
- ☐ Payment gateway connection rate
- ☐ Template selection analytics

Commerce Metrics

- ☐ GMV tracking
- ☐ Checkout conversion rate
- ☐ Payment success rate
- ☐ Orders per merchant

Retention Metrics

- ☐ Weekly active merchants
 - ☐ Monthly active stores
 - ☐ Plugin install rate
 - ☐ AI action tracking
-

Known Gaps (Post-Launch)

Phase 2 Features

- ☐ AI full-store builder
- ☐ AI theme generator
- ☐ AI plugin generator

- ☐ Plugin marketplace
- ☐ Template marketplace
- ☐ Abandoned cart automation
- ☐ A/B testing
- ☐ AI conversion audit
- ☐ Local logistics integrations
- ☐ Multi-language support
- ☐ Social commerce imports

Post-MVP Features

- ☐ Reviews system (partially implemented)
 - ☐ Loyalty points
 - ☐ Affiliate/referral system
 - ☐ Multi-location inventory
 - ☐ Staff accounts
 - ☐ POS-lite
 - ☐ Multi-currency checkout
 - ☐ B2B wholesale pricing
-

Configuration Checklist

Environment Variables

- ☐ Database URL
- ☐ AI provider API keys
- ☐ Payment gateway keys
- ☐ JWT secret
- ☐ NextAuth secret
- ☐ Upload service credentials
- ☐ Email service credentials

Default Settings

- ☐ Default currency per country
 - ☐ Default payment methods
 - ☐ Default delivery zones
 - ☐ Default theme per industry
 - ☐ Default templates
-

Support Readiness

Support Infrastructure

- ☐ Help documentation
 - ☐ Contact support flow
 - ☐ Issue reporting system
 - ☐ User feedback collection
 - ☐ Support ticket system
-

Summary

Total Checklist Items: 150+

Status: Implementation covers most Phase 1 MVP requirements

Key Focus Areas: Payment gateway testing, AI provider configuration, security hardening, performance optimization

This checklist is based on the PRD for AI-Powered Ecommerce, Landing Page & Website Builder for Africa-First Businesses
